

## Roof Coating Range Product Overview

### Global Leader In Roof Coating Technology

The NuTech professional roof restoration system includes specially formulated primers, sealers and topcoats for a wide range of roof surfaces.

NuTech roof coatings are designed to withstand the tough Australian environment, protecting and enhancing the appearance of your most valued asset. Unlike many other roof paints, NuTech roof coatings are manufactured from tough acrylic resins and fade resistant pigments which are durable, flexible and resistant to ultraviolet sunlight. This provides complete waterproof protection for your roof.

NuTech roof coatings are also environmentally friendly and suitable for the collection of drinking water.

### NXT COOL ZONE

NXT Cool Zone has been developed to reduce the temperature of your roof and provide excellent heat reflective capabilities without sacrificing colour choice. It is available in a standard range of 29 traditional and contemporary colours.

This highly effective and innovative roof coating reflects the heat away from the roof surface to reduce the heat in the attic space. Testing has shown that reducing the surface temperature of the roof by 30°C translates to a 10°C reduction in the temperature of the living space below.

NuTech roof coatings will protect and enhance the appearance of your home. We have developed the complete restoration system to beautify and improve the performance of your roof for many years to come.

## Concrete Coating Range Product Overview

### Australia's #1 Concrete Sealer

NuTech is the market leader for durable penetrating concrete sealers that provide longevity and easy maintenance for a variety of concrete and paved areas.

The NuTech professional concrete sealer range includes sealers, high build coatings, top coats and anti-slip agents for a wide range of surfaces.

Our Petrol Resistant Sealer is used extensively across Australia for Petrol Stations and small Mechanical Workshops.

Our 2 pack Epoxy products, both solvent and water based, are used across a wide variety of warehouse applications, along with retail showrooms, breweries, wineries, restaurants and other high traffic/high wear situations.

### PAVECOAT & PAVECOAT H<sub>2</sub>O

PaveCoat is a high performance, solvent based acrylic sealer recommended for a wide variety of functional, decorative and protective concrete applications. PaveCoat seals, colours and protects concrete to provide a durable surface ideal for pedestrian and light vehicle traffic, making it an economical and long-lasting choice.

PaveCoat H<sub>2</sub>O is a water-based acrylic emulsion specifically formulated to overcome the environmental issues often associated with traditional solvent-based concrete sealers. Recommended for a wide variety of functional, decorative and protective concrete applications.

NuTech has a comprehensive coatings range to provide durable, decorative and protective solutions and finishes for any concrete surface requirement.

NuTech's success can be attributed to development and specialisation in a number of areas. With a primary focus on roof coatings and concrete sealers, NuTech Paint has developed unique and tailored formulas to survive the harsh Australian conditions.

NuTech's diverse yet tailored range of products has created a solution for every surface, with care taken at every step to ensure that each application will result in a perfect finish.

Our distribution partnerships ensure NuTech's range of products is available both nationally and internationally.

"Our passion for customer satisfaction, through innovative and environmentally friendly technologies, drives our quality and reputation."

Perry Eckert - Owner

### A HISTORY OF EXCELLENCE

Founded in 1972, NuTech Paint is a Melbourne based, family owned company that has expanded both nationally and internationally. NuTech has proven to be a leader in the transformation of the coatings industry, with a focus on new technologies and environmentally friendly solutions.

Manufactured entirely in Australia, NuTech products proudly boast the Australian made and owned moniker and support local groups and communities. This has been recognised a number of times, including achieving a Frankston & Peninsula Best Business Award.

This focus also extends to the local environment. To care for Australia's unique and diverse ecology, NuTech has committed to be an industry leader in water based and biodegradable products. Special care is taken to ensure that the water based products perform as expected, with results matching the traditional solvent based options. Other solutions include products that reflect the sun to promote cooling, as well as paint stripping and preparation products that have no lasting impact on the waterways.

### SOLUTIONS FOR ANY SURFACE

With products suitable for roofing, concrete, sports surfaces, pools, industrial, commercial and rural applications, along with a wide range of paint strippers and surface preparation products, NuTech has a product that will fulfill your needs.

NuTech Paint is more than just a coatings company. The EcoSafe range of paint strippers and preparation products are biodegradable, whilst still having formulas that actively work to clean and prepare a wide variety of surfaces, making them ready for painting.

Building on our existing experience and global partnerships, NuTech aims to continually drive innovation in coating technologies. Our focus is on developing products that have beneficial environmental outcomes.

For detailed product information, SDS's, TDS's, application guides, user testimonials and how-to-blogs, visit the website at [nutech.com.au](http://nutech.com.au).

The NuTech colour range is manufactured from durable, fade resistant pigments to withstand the harsh extremes of the Australian environment.
